Dear Mr. McCabe,

**RE: Grand Rapids Pipeline GP Ltd. Grand Rapids Pipeline Project
Decision 2014 ABAER 012
Condition Compliance Update - Condition 2**

Grand Rapids Pipeline GP Ltd. (Grand Rapids) provides the following update to the Alberta Energy Regulator (AER) on compliance with Condition 2 of Decision 2014 ABAER 012 (Decision) for the Grand Rapids Pipeline Project (Project). Condition 2 states:

Grand Rapids must prepare and submit to the satisfaction of the AER on or before February 28, 2015, a detailed right-of-way monitoring and response plan for both the white and green areas. The plan must demonstrate its ability to effectively monitor the full length of its ROW and respond to issues that may arise during the extended construction period before the ROW is reclaimed. Within the plan, Grand Rapids must:

- a) identify areas at high risk of wind and water erosion, water-body sedimentation, surface water ponding, and weed establishment, including watercourse crossing locations;*
- b) state what methods it will use to monitor the ROW and any identified high-risk area (e.g., aerial reconnaissance, ground-based inspections, landowner observations);*
- c) include when and how frequent it will monitor high-risk areas and sites;*
- d) describe how it will respond to wind and water erosion, sedimentation, and the onset of weed growth, including logistics and timing; and*
- e) list the types and locations of materials and equipment it will use to facilitate a timely and effective response to any issues that may arise.*

Grand Rapids prepared a Right-of-Way Monitoring and Response Plan (the Plan) as outlined in Condition 2. The Plan was submitted to the AER on February 26, 2015 and addresses the right-of-way monitoring and mitigation measures that Grand Rapids will implement during the construction phase of the Project. The Plan also provides a list of areas at high risk of wind and water erosion, waterbody sedimentation, surface water ponding, weed establishment and watercourse crossing locations for the pipeline construction right-of-way within the White and Green Areas of Alberta.

Grand Rapids addressed Strathcona County's comments on the Plan and included the AER in our response to Strathcona County April 14, 2015. To our knowledge no other comments from other stakeholders have been received regarding the Plan.

Please be advised that both the 508 mm (20 inch) and 914 mm (36 inch) pipelines will be constructed in summer 2015 along Spread 8 (the only Spread in Strathcona County). Along the remaining Spreads the 508 mm (20 inch) pipeline will be constructed and reclaimed by December 2015.

If you have any questions or can provide further direction on closing the condition, please do not hesitate to contact me. Sincerely,

A handwritten signature in black ink, appearing to read 'Tammy Ramanat', with a stylized, cursive script.
