Dear Mr. McCabe,

**RE: Grand Rapids Pipeline GP Ltd. Grand Rapids Pipeline Project
Decision 2014 ABAER 012
Condition Compliance Update – Condition 16**

Grand Rapids Pipeline GP Ltd. (Grand Rapids) provides the following update to the Alberta Energy Regulator (AER) on compliance with Condition 16 of Decision 2014 ABAER 012 (Decision) for the Grand Rapids Pipeline Project (Project). Condition 16 states:

Grand Rapids through the use of a qualified aquatic environment specialist must assess the status of all fish-bearing watercourse crossings at the time of construction to verify that the proposed crossing method remains valid.

The AER has requested the following, to ensure condition 16 is met:

Grand Rapids will submit to the AER a letter signed by a qualified aquatic environmental specialist outlining the results of the assessment.

Grand Rapids commissioned TERA, a CH2M HILL Company (TERA), to assess each of the watercourse crossings along the proposed pipeline route. Grand Rapids developed a Water Quality Monitoring plan for Spreads 3 and 4 of the Project that was submitted to the AER on February 28, 2015. Grand Rapids is currently evaluating the need for water quality monitoring for construction activities anticipated to commence in summer 2015 and would be pleased to discuss the plan with the AER, as required.

If you have any questions or can provide further direction on closing the condition, please do not hesitate to contact me.

Sincerely,

Tammy Ramanat
