Calgary, Alberta T2P 0R4

Dear Mr. McCabe,

**RE: Grand Rapids Pipeline GP Ltd. Grand Rapids Pipeline Project  
Decision 2014 ABAER 012  
Condition Compliance Update - Condition No. 7**

Grand Rapids Pipeline GP Ltd. (Grand Rapids) provides the following update to the Alberta Energy Regulator (AER) on compliance with Condition 7 of Decision 2014 ABAER 012 (Decision) for the Grand Rapids Pipeline Project (Project). Condition No.7 states:

*Grand Rapids must have a qualified wildlife specialist available during clearing and construction activities to ensure sensitive areas are clearly marked, to deal with issues that arise, and to ensure plans and conditions are being followed as intended.*

The AER has requested the following, to ensure this condition is met:

*Grand Rapids will submit to the AER a letter signed by a qualified wildlife specialist confirming that the requirement has been met.*

Grand Rapids will have qualified Environmental Inspectors on-site during all construction activities with the potential to affect the environment, including clearing, topsoil and stripping salvage, and watercourse and wetland crossing installation. When on site, the Environmental Inspectors will have copies of the Conservation and Reclamation (C&R) Report, the Green Area Environmental Protection Plan (EPP) and the associated Environmental Alignment Sheets on-site as well as copies of all regulatory approvals and notifications. The Environmental Inspector will be responsible for the implementation of all site-specific mitigation measures, such as the installation of fencing and/or flagging to denote sensitive areas, as well as general Project mitigation measures. If a situation arises in which they are unsure of the appropriate mitigation measures or course of action, the Environmental Inspectors can contact TERA's, a CH2M HILL Company (TERA), Wildlife Biologists and Specialists at any time. The Wildlife Biologist or Specialist may provide advice over the phone, email and/or come to site, as the situation requires. A letter was provided from TERA to Grand Rapids on March 2, 2015 outlining that TERA will assist Grand Rapids during all clearing and construction activities to ensure Condition No. 7 is met.

To date, Environmental Inspectors have been present during all construction activities. Grand Rapids commits to ensuring this process is adhered to until the completion of construction activities.

If you have any questions or can provide further direction on closing the condition, please do not hesitate to contact me.

Sincerely,

Tammy Ramanat
