Don McCabe
Alberta Energy Regulator
Suite 1000, 250 – 5th Street S.W.
Calgary, Alberta T2P 0R4

Dear Mr. McCabe,

**RE: Grand Rapids Pipeline GP Ltd. Grand Rapids Pipeline Project
Decision 2014 ABAER 012
Condition Compliance Update – Condition 18**

Grand Rapids Pipeline GP Ltd. (Grand Rapids) provides the following update to the Alberta Energy Regulator (AER) on compliance with Condition 18 of Decision 2014 ABAER 012 (Decision) for the Grand Rapids Pipeline Project (Project). Condition 18 states: *Any exceedance of ESRD's suspended sediment thresholds must be reported to the AER immediately and appropriate mitigation measures must be implemented.*

The AER has requested the following, to ensure condition 18 is met:

Grand Rapids will notify the AER of any threshold exceedance events and submit reports outlining mitigation measures implemented.

Grand Rapids confirms that in the event that Environment and Sustainable Resource Development's suspended sediment thresholds are exceeded, Grand Rapids will report the exceedance to the AER immediately and appropriate mitigation measures outlined in the Environmental Protection Plans prepared for the Project will be implemented. Grand Rapids will develop water quality monitoring plans to monitor for sediment events during instream construction activities as required by the applicable regulatory approvals such as the Department of Fisheries and Oceans *Letter of Advice*. If monitoring reveals sediment values are approaching threshold values, the water quality monitors will alert the Environmental Inspector(s) and work with them to develop corrective actions. If corrective actions are not successful, construction activities will be temporarily suspended until effective solutions are identified. In the event of sediment releases or spills of deleterious substances during the construction of the trenchless crossings, Grand Rapids will implement the Directional Drilling Procedures and Instream Drilling Mud Release Contingency Plan.

If you have any questions or can provide further direction on closing the condition, please do not hesitate to contact me.

Sincerely,

Tammy Ramanat
