Attention: Ms. Anastasia Shukalkina

Dear Ms. Shukalkina

**Re: White Spruce Pipeline Project
AER Decision 2018 ABAER 001
Condition Compliance – Condition 2 of the Decision**

TransCanada PipeLines Limited (TransCanada) is providing this letter to inform the AER that Construction for the Project was completed on March 27, 2019 and to confirm condition compliance with Condition 2 of Decision 2018 ABAER 001 (Decision) for the White Spruce Pipeline Project (Project). Condition 2 of the Decision (Condition 2) states:

If moose are identified in the immediate vicinity (right-of-way plus 100 metres) of the construction zone, TransCanada must immediately suspend work in the vicinity of the moose, assess the situation, and allow construction to resume only when the moose have moved safely away from the construction zone.

During construction activities, the Project did identify moose within the vicinity of the construction zone. TransCanada confirms that when moose were confirmed to be within the immediate vicinity of the construction zone, construction work was immediately suspended. TransCanada did not resume work until the Project's Environmental Inspector assessed the situation and provided the approval for work to be resumed once the moose had moved safely away from the construction zone.

Should the AER require additional information with respect to compliance with Condition 2 please contact Stefan Skocylas at (403) 920-7695 or email Stefan_Skocylas@transcanada.com.

Sincerely,

Stefan Skocylas
