Calgary, AB T2P 0R4

Attention: Ms. Anastasia Shukalkina

Dear Ms. Shukalkina

**Re: White Spruce Pipeline Project
AER Decision 2018 ABAER 001
Condition Update – Condition 2 of the Decision**

TransCanada PipeLines Limited (TransCanada) is providing this letter to update the Alberta Energy Regulator (AER) on compliance with Condition 2 of Decision 2018 ABAER 001 (Decision) for the White Spruce Pipeline Project (Project). Condition 2 of the Decision (Condition 2) states:

If moose are identified in the immediate vicinity (right-of-way plus 100 metres) of the construction zone, TransCanada must immediately suspend work in the vicinity of the moose, assess the situation, and allow construction to resume only when the moose have moved safely away from the construction zone.

TransCanada understands the intent of Condition 2 of the Decision is to reduce the effects of the Project on moose habitat and movement. TransCanada's has updated the Project specific Environmental Protection Plan (EPP) – Rev.5 to address Condition 2 as follows:

In the event that a moose is identified in the immediate vicinity (right-of-way plus 100 m) of the construction zone, suspend work in the vicinity of the moose and notify the Environmental Inspector(s) who will notify the Construction Manager. The Environmental Inspector(s) will assess the situation and will allow construction to be resumed only once the moose has moved safely away from the construction zone.

Should the AER require additional information with respect to compliance with Condition 2 please contact the undersigned at (403) 920-8078 or Paige Dodd at (587) 933-3573 or email paige_dodd@transcanada.com.

Sincerely,

Dana Charlton, M. Sc., P. Biol.
