Ms. Shukalkina

RE: Grand Rapids Pipeline GP Ltd. Grand Rapids Pipeline Project
Decision 2014 ABAER 012
Condition Compliance Update - Condition 18

Grand Rapids Pipeline GP Ltd. (Grand Rapids) requests that the Alberta Energy Regulator (AER) accept the following information as acknowledgement of compliance with Condition 18 of Decision 2014 ABAER 012 (Decision) for the Grand Rapids Pipeline Project (Project). Condition 18 states that:

Any exceedance of ESRD's suspended sediment thresholds must be reported to the AER immediately and appropriate mitigation measures must be implemented.

The AER has requested the following, to ensure this condition is met:

Grand Rapids will notify the AER of any threshold exceedance events and submit reports outlining mitigation measures implemented.

Grand Rapids confirms that it has reported one threshold exceedance event that occurred during instream construction and has submitted a report outlining mitigation measures on March 16, 2015. No further exceedance events have occurred.

Based on the above, Grand Rapids submits that the intent and requirements of Condition 16 have been met and the Condition has been completed. If you have any questions or require any further information, do not hesitate to contact me.

Sincerely,

Paige Dodd
